Rural Training: *"This experience has given me the opportunity to connect with physicians in rural Missouri. My counterparts, at the main campus for their entire clinical education, are not able to experience the joy of practicing medicine outside the walls of an academic center. I would imagine they are less inclined to venture outside these walls once in practice. MAHEC coordinates our experiences, ensuring that our education is of the highest quality, and help us integrate into the communities to which we come to learn."* **Med Student 2010**
